Summary

AI/ML Engineer with hands-on experience in Machine Learning, NLP, Retrieval-Augmented Generation (RAG), Python backend development, and scalable data pipelines. Experienced in developing production-grade REST APIs using FastAPI, integrating LLMs, vector databases, and PostgreSQL while deploying end-to-end ML solutions.

Experience

Software Developer Intern (AI/ML) — May 2026 – Present
Agicent Technology — *Noida, India*

- Developing production-grade Machine Learning and NLP applications using Python, FastAPI, TensorFlow, and LLM frameworks.
- Building Retrieval-Augmented Generation (RAG) pipelines with vector databases for semantic retrieval and question answering.
- Designing scalable REST APIs, ETL workflows, and backend services for AI deployment.
- Collaborating on end-to-end deployment, model integration, debugging, and performance optimization to deliver production-ready AI solutions.

Software Developer Trainee — Jan 2026 – March 2026
Antino Labs Pvt Ltd — *Gurgaon, India*

- Designed and deployed 4+ production REST APIs (Python, FastAPI), cutting client integration time by 40%+.
- Developed Retrieval-Augmented Generation (RAG) pipelines using LangChain, FAISS, and vector embeddings for semantic search across structured and unstructured datasets.
- Architected PostgreSQL schemas integrated with vector embeddings for LLM-based retrieval.
- Built an OCR-based invoice extraction system to automate structured data capture from unstructured invoices.

Software Development Intern — Jun 2025 – Nov 2025
Boolean Microsystems Pvt Ltd

- Created backend modules and automation scripts in Python for internal enterprise tools.
- Integrated external APIs and implemented SQL-based database operations for application workflows.
- Developed an AI fitness tracker using pose-detection to analyze user movement and form in real time.
- Debugged backend services, improving reliability of internal applications.

Projects

Multi-Source RAG System — Live | GitHub
Python, LangChain, FAISS, FastAPI, PostgreSQL, Vector Embeddings, REST APIs, LLM, RAG

- Developed an end-to-end Retrieval-Augmented Generation (RAG) system integrating PDFs, databases, and web sources, improving answer accuracy by 30%.
- Implemented semantic vector search using FAISS and optimized retrieval pipelines, reducing latency by 40%.
- Built scalable Python backend services using FastAPI for real-time LLM inference and concurrent request handling.

Agri AI — Live | GitHub
Python, Scikit-learn, Pandas, NumPy, Streamlit, Machine Learning, Data Visualization

- Built and evaluated ML models for crop recommendation using soil and environmental datasets, achieving 95%+ prediction accuracy.
- Improved model generalization using feature engineering, preprocessing, and cross-validation across multiple ML algorithms.
- Developed and deployed an interactive Streamlit application for real-time crop prediction and recommendation.

Core Skills

Languages: Python, SQL, C/C++
Machine Learning: Scikit-learn, TensorFlow, Pandas, NumPy, OpenCV, Regression Models, Clustering
Backend: FastAPI, REST API Design, API Integration
Databases: PostgreSQL, MySQL, SQLite
Generative AI / LLM: LLMs, Retrieval-Augmented Generation (RAG), Prompt Engineering, Semantic Search, Vector Embeddings, LangChain
Vector Databases: FAISS, ChromaDB
Cloud & Tools: Docker, Linux, GitHub Actions, AWS (Basic), Git/GitHub, MLflow, Streamlit, Jupyter Notebook
Other: Model Deployment, ETL Pipelines, Data Visualization, Data Cleaning

Education

Dr. A. P. J. Abdul Kalam Technical University (AKTU) — Jul 2022 – May 2026
B.Tech in Information Technology — 8.1
